Adam Davis

Frontend Engineer + Product Designer

I am a passionate software engineer and designer with over four years experience; skilled in creating joyful designs both in software architecture and in the user experience.

I work hard to ensure the products I create are beautiful, easy to use, and wonderfully satisfying.

Employment History

Lead Frontend Engineer; Designer at Sionic, Atlanta

JUNE 2021 — JULY 2023

Sionic is a financial tech company where I worked with a brilliant team to build scalable web applications / SAAS apps and lead the development of the front end.

- I created a SPA web plugin for facilitating "Real-Time Payments" transactions between consumer and business banks from within major mobile banking apps using **React** and **TypeScript** and leveraging **Google Cloud Platform**.
- Designed and built an administrator web app portal in which business owners can interact with our **Postgres** database to easily monitor and update their data.
- Designed and developed Sionic's re-branded website as well as several marketing SEO web pages.
- Lead the redesign of Sionic's **Agile** task management system in **Jira** to decrease productivity bottlenecks we were experiencing.

Web Developer at Omega Design & Development

DECEMBER 2019 — FEBRUARY 2024

At the *Omega Design & Development Co.* shop I worked with clients from a diverse set of industries. Designing and developing their digital presence from scratch, I provided them with quality, **cross-browser compatible, mobile responsive** production software which *increased target engagement by 80% on average* using my marketing and SEO knowledge combined with my eye for design and my web development skills.

After Hours

Programming Mentor

NOVEMBER 2021 — PRESENT

After work hours I have been teaching and mentoring; aiding in programming skills from absolute beginner to job-ready professional. I learned a lot through teaching, plus it helped me to solidify my previous knowledge.
